

src/obsolete/eventid.cpp

```
graph TD; A[src/obsolete/eventid.cpp] --> B[eventid.h]; B --> C[abstractincrementalid.h]; C --> D[abstractid.h]; D --> E[QtCore/QtGlobal]; D --> F[QtCore/QDataStream];
```

A flowchart illustrating the relationship between several files. At the top is a grey box labeled 'src/obsolete/eventid.cpp'. A blue arrow points down to a white box labeled 'eventid.h'. Another blue arrow points down to a white box labeled 'abstractincrementalid.h'. A third blue arrow points down to a white box labeled 'abstractid.h'. From 'abstractid.h', two blue arrows branch out: one pointing down and to the left to a white box labeled 'QtCore/QtGlobal', and another pointing down and to the right to a white box labeled 'QtCore/QDataStream'.

eventid.h

abstractincrementalid.h

abstractid.h

QtCore/QtGlobal

QtCore/QDataStream
